Sintered Stone by Motto

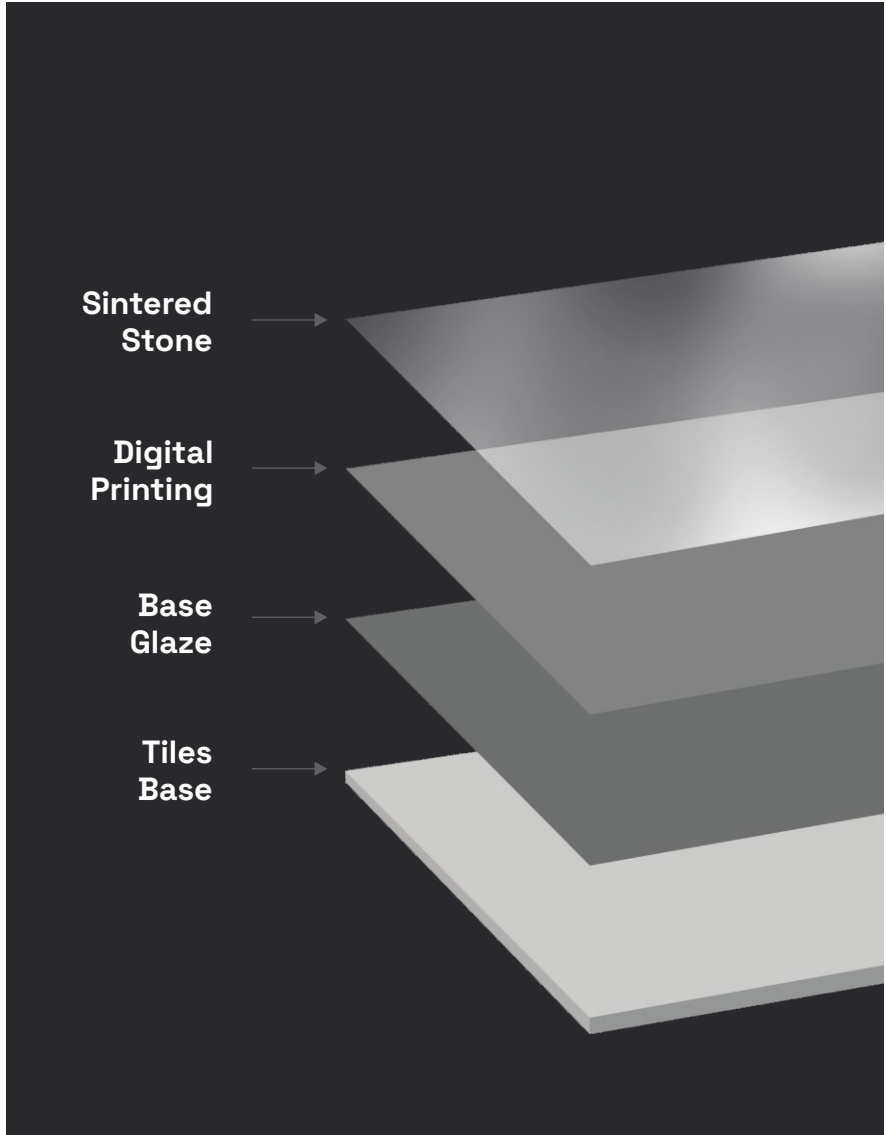

The Sintered Stone by Motto is a modern ceramic marvel made from natural materials whilst eliminating the limitation of natural stones like porosity, low heat, and stain resistance, and offering an eco-conscious, functional, and aesthetic tiling solution.

SINTERED **STONE**

What is Sintered Stone?

Sintered Stone by Motto is an exceptional range of ceramic products complexly fabricated using sintering technology. The technology produces durable and resilient ceramic tiles & slabs using natural raw materials and compacting them under extreme pressure and heat transforming materials much stronger than their individual parts.

Motto employs the latest Continua+ from Sacmi - the most advanced technology in the ceramic industry enabling a single plant to manufacture a wide range of tile sizes, thicknesses, and decorations with zero wastage 100% recyclability, low cost of operation, and the lowest energy consumption.

The technology is equipped with computer vision optimizing surface decoration facilitating sharper on-tile detailing. The technology also integrates automatized powder decoration and native connection to H.E.R.E for enhanced Digital Manufacturing 4.0 processes.

Benefits of Sintered Stone by the House of Motto

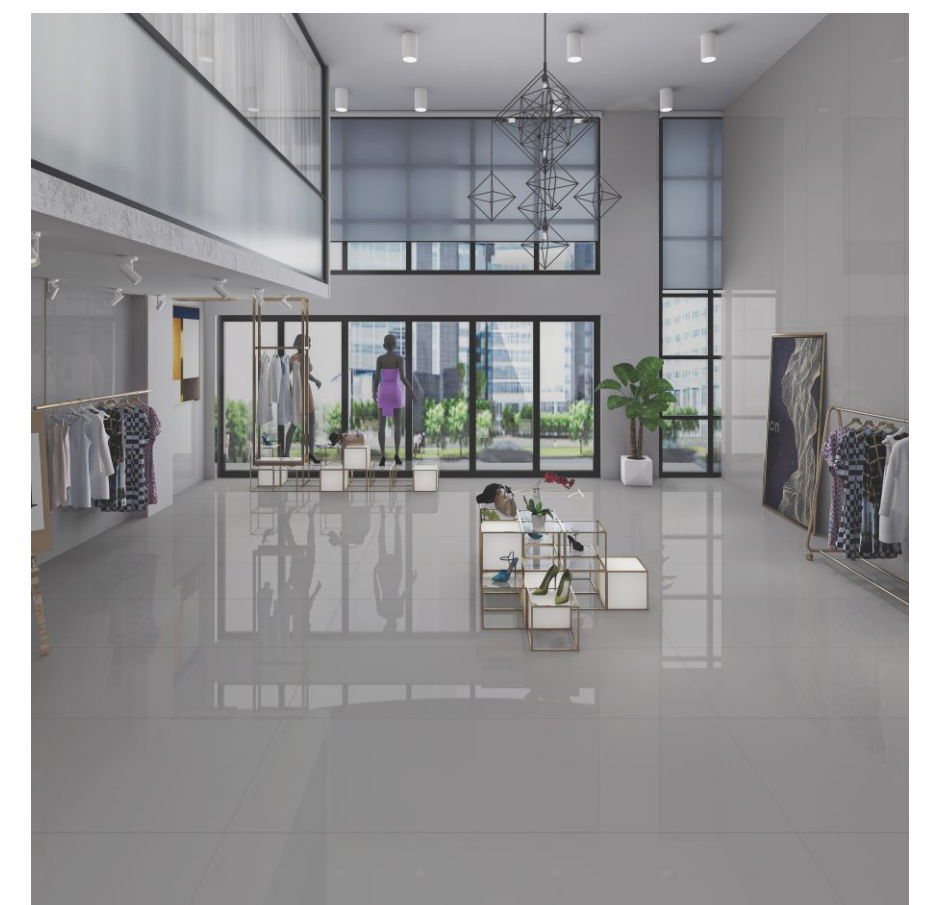

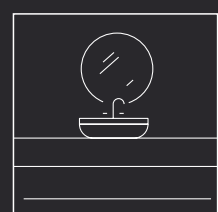

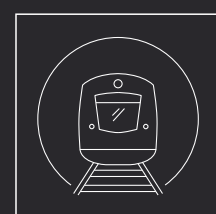

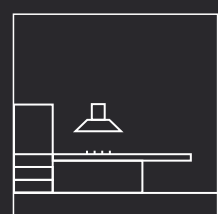

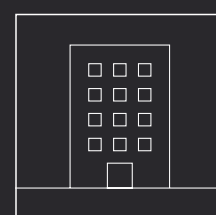

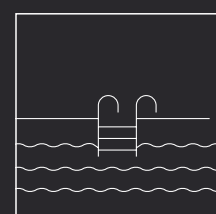

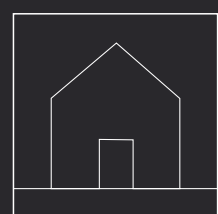

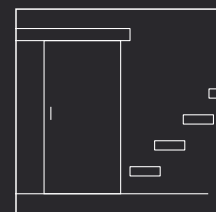

The durable build, resilient form, and superior quality of the Sintered Stone offer extensive benefits making it ideal for modern-day lifestyles and spaces with features that offer effortless maintenance.

-  **Durable Material**
-  **Weatherproof**
-  **Heat & Fire Safe**
-  **Water Resistant**
-  **Stain Resistant**
-  **Chip & Scratch Resistant**
-  **Easy to Clean**
-  **Food Safe & Hygienic**

Application Areas of Sintered Stone

Available in a versatile range of designs and colors, robust thickness, colossal format, and unmatched features, the Sintered Stone is ideal for multifarious and extensive applications indoors and outdoors including wall and furniture cladding, staircase, swimming pool borders, and a lot more.

- Flooring
- Stairs
- Exterior Wall Cladding
- Swimming Pool Border
- Dining Table Top
- Commercial Areas
- Kitchen Counter Top
- Metros & Railway Stations
- Bathroom Vanities
- Patios and Outdoor Flooring

Versatile format & thickness of Sintered Stone

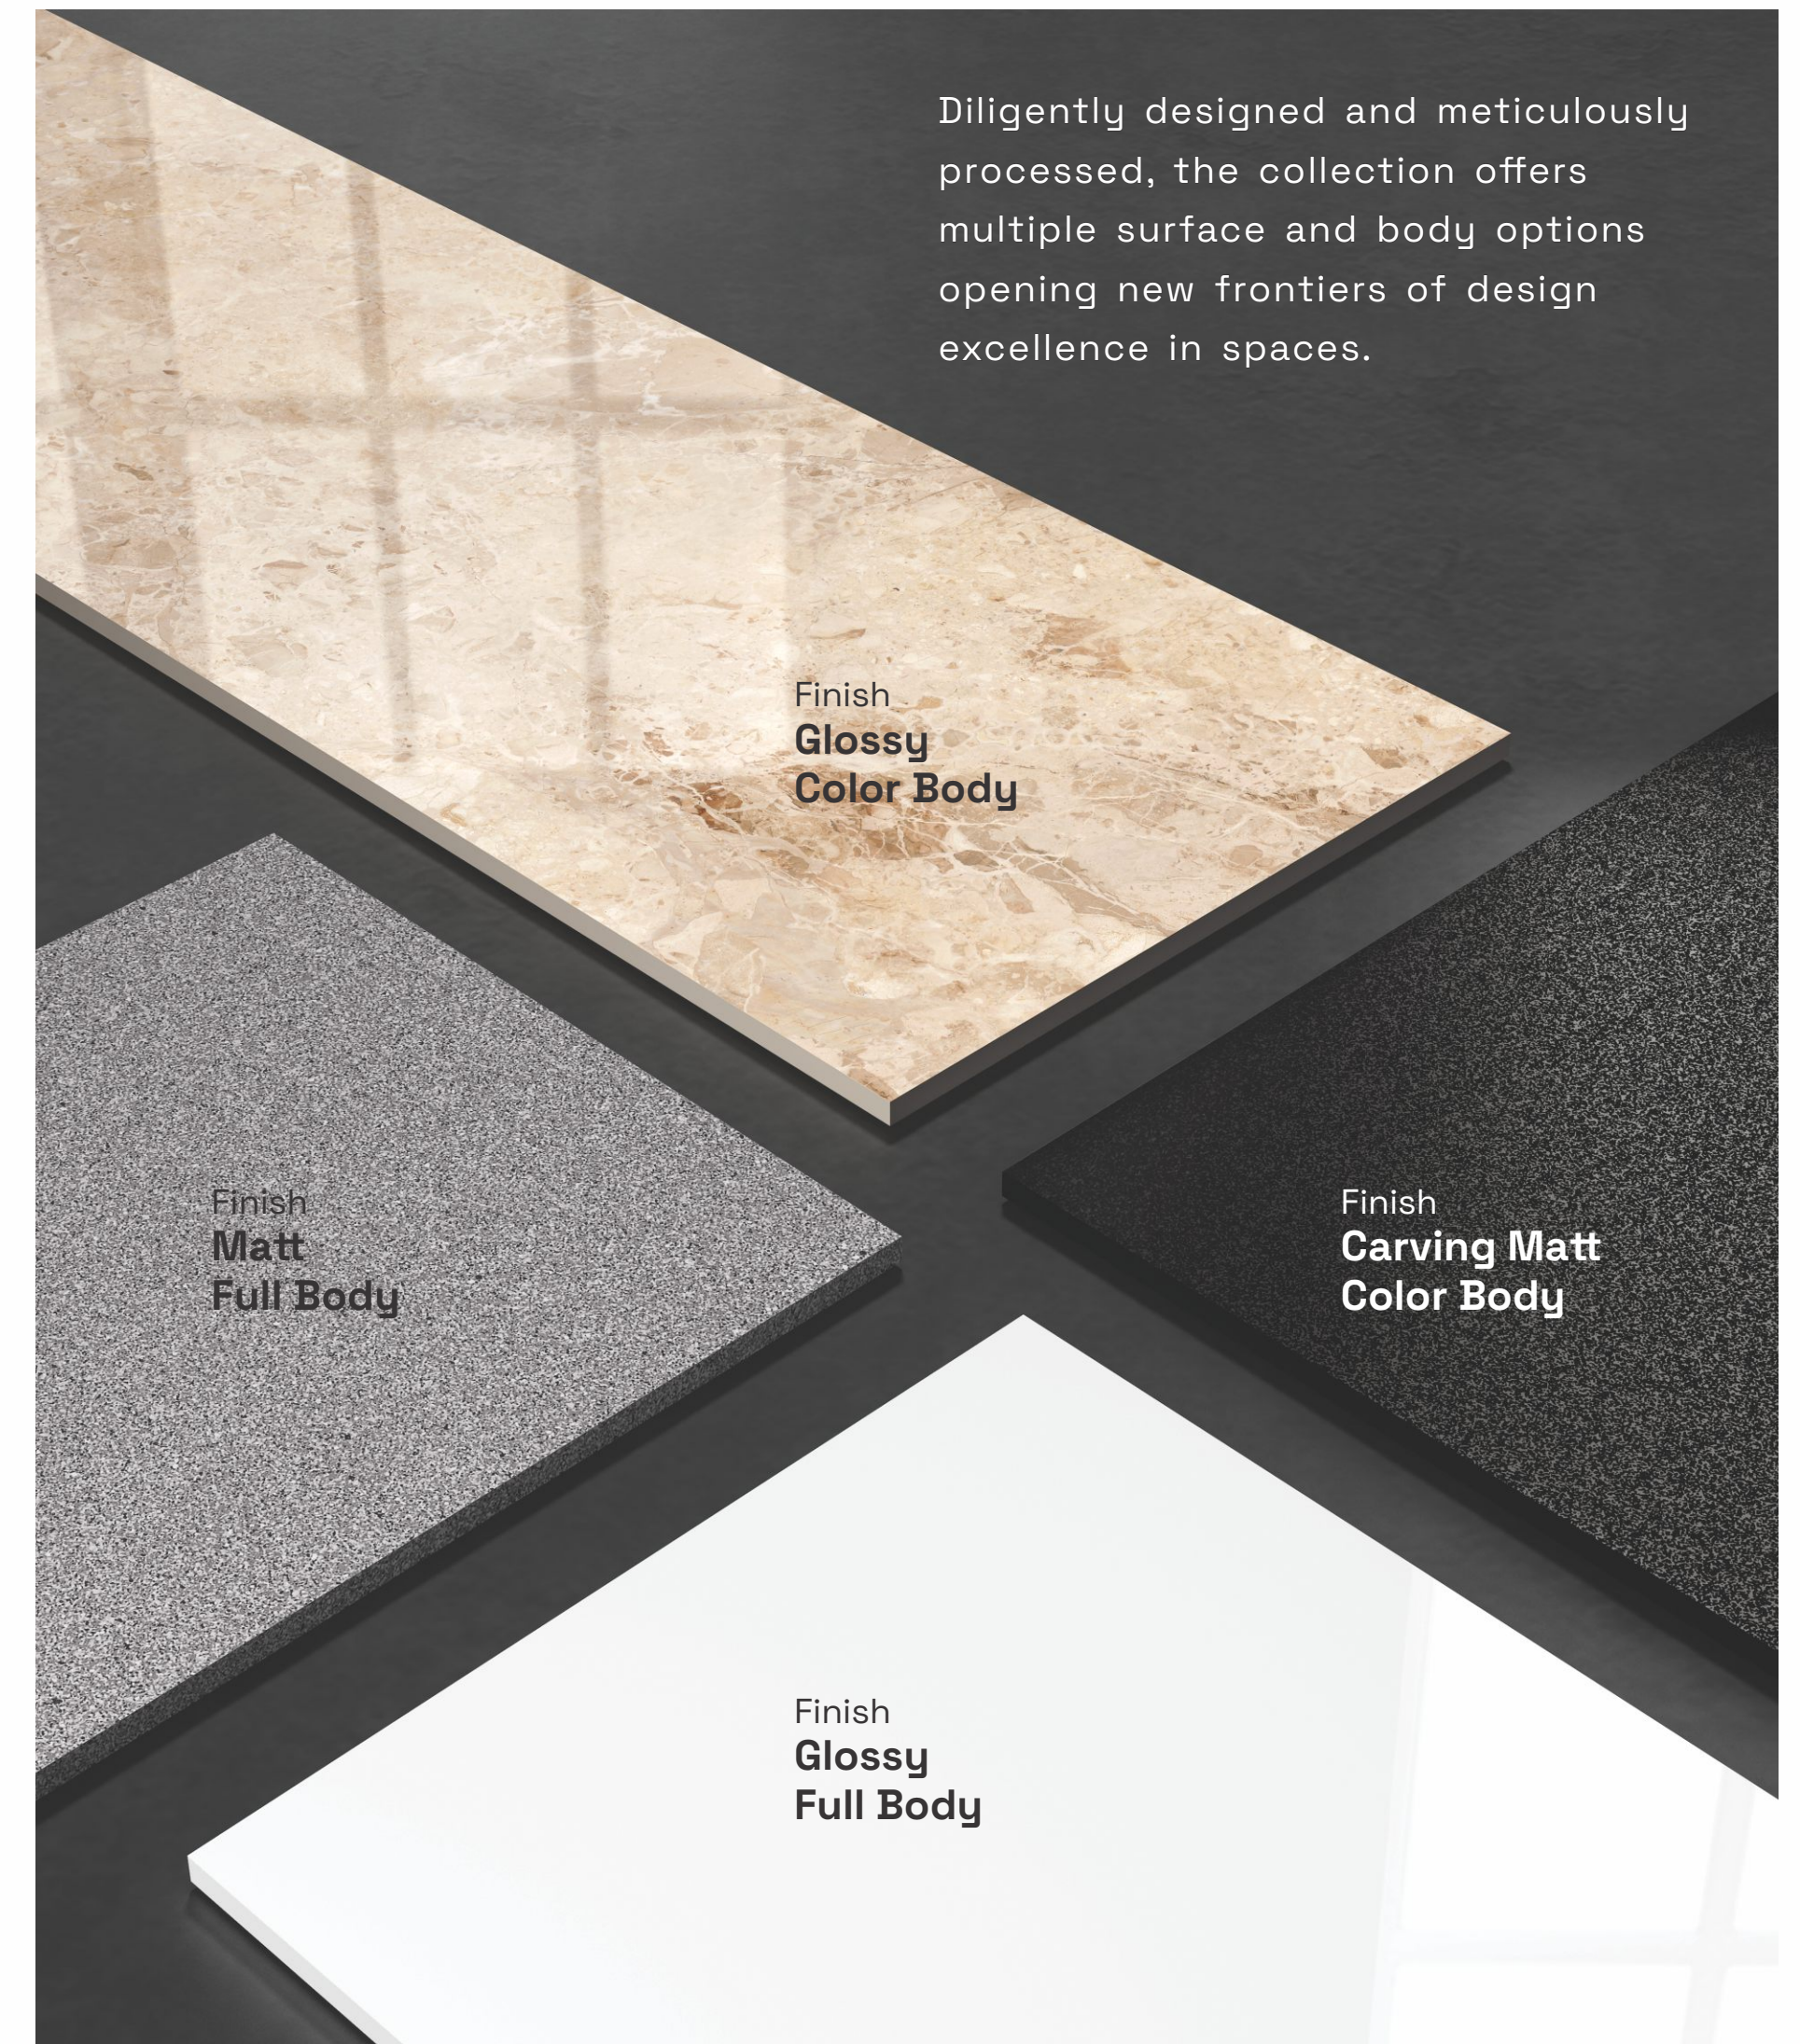

The collection is available in the magnificent size of 800x2400mm and 15mm durable thickness making it ideal for a plethora of seamless applications without unflattering grout lines promoting flawless look and enhanced hygiene.

800x2400mm
80x240cm

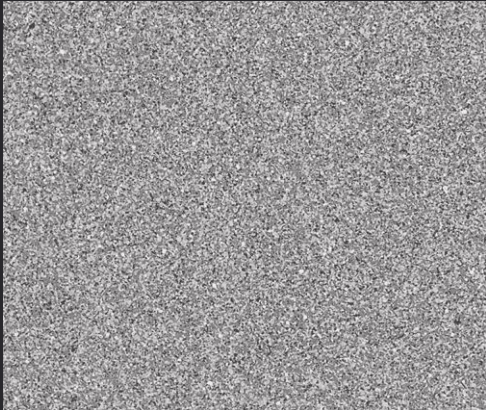

Superior surfaces of the Sintered Stone

Diligently designed and meticulously processed, the collection offers multiple surface and body options opening new frontiers of design excellence in spaces.

An aesthetic array of designs & colors

Available across three versatile collections - Salt & Pepper, Plain, and Marble, The Sintered Stones is a feat of multifaceted, adaptable, and trend-transcending ceramic aesthetics breaking boundaries of innovation and style.

WORKING WITH THE VARIOUS VERSIONS OF
SLAB

CUTTING WITH DIAMOND DISCS

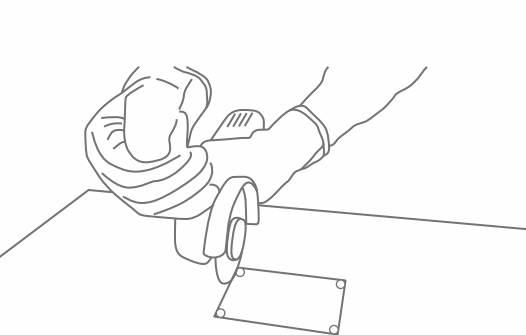

Our products can be cut using diamond discs fitted onto the hand-held electrical grinding machine. The speed of Disc rotation must be high (>10000 RPM) and should have a low feed rate (< 1 m/min). It may be required to cool the disc with water. Recommended discs are the thin types generally used for cutting porcelain stoneware. The surface should be kept on a FLAT base while cutting without any gap underneath.

DRILLING

You can use cutting discs fitted to battery-operated screwdrivers or angle grinders, or electrical drills as an alternative.

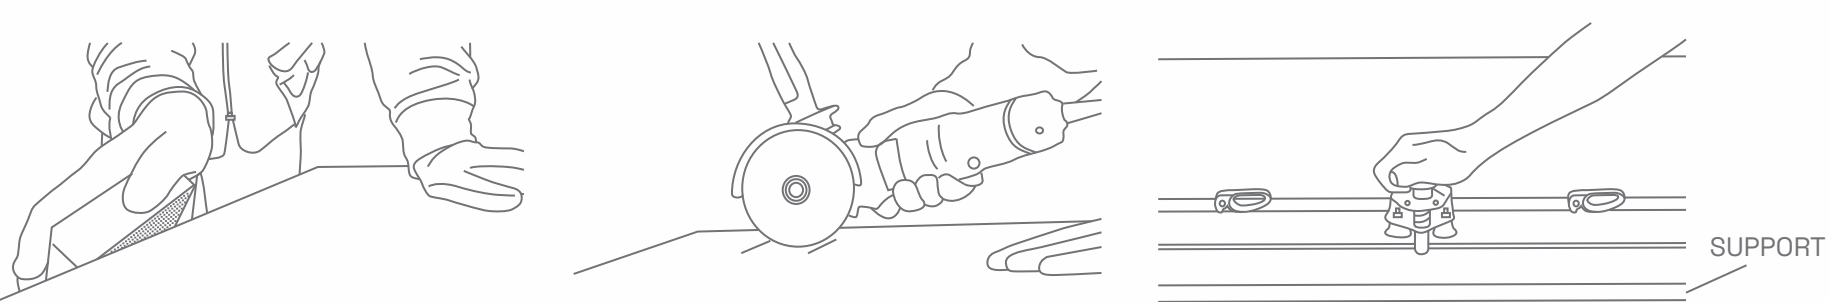

INTERNAL CUT/L-SHAPED CUT

To get internal and L-shaped corners & to reduce the risk of breakage, cut 'o' at the vertex of the internal corners using bits with a radius of at least 5mm. Then cut with diamond discs, be cautious to stop moving the cutting tool forward. To drill and cut using diamond discs, and more follow the instructions provided below:

- When using these tools:
- Cool the point being drilled with water
 - Don't put too much pressure and bear in mind the resistance of the type of laminated stoneware you are working on
 - If you are using tungsten bits, start drilling at a low speed
 - If you are using drills or screwdrivers, do not select hammering mode

EDGE-FINISHING

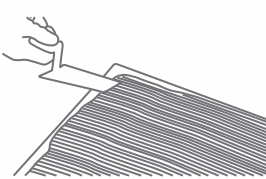

INSTRUCTIONS FOR MANUAL INSTALLATION

SINGLE LAYER METHOD

DOUBLE-LAYER METHOD

COMPRESSING THE SLAB

IMPORTANT

All cutout corners must have a minimum diameter of 1/4". Never leave 90° angles. We recommend a radius of more than 1/4" when the kitchen design allows as it makes the countertop firmer.

✗ INCORRECT

✗ INCORRECT

CLEANING & MAINTENANCE

Our products are non porous (due to their high quality raw materials, stringent production parameters and state of the art technology), hence any dust or deposited waste cannot penetrate the surface.

For most cases only a damp cloth is sufficient for cleaning.

Regular cleaning highlights the aesthetic features of the surface and gives it exceptional shine.

For highly aggressive cleaning caused by some common food and substances follow the table below.

TYPE OF STAIN	CHEMICAL PRODUCT	EXAMPLE
Grease	Alkaline - Solvent	Detergent
Oil	Solvent	Ammonia, Backing Soda
Ink	Oxidant - Solvent	Alcohol, Liquid Bleach, Nail Paint Remover
Rust	Acid	Hydrochloric Acid, Vinegar, Red Harpic
Lime	Acid	Descaling Reagent, Hydrochloric Acid
Cement	Acid	Hydrochloric Acid
Wine	Alkaline	Ammonia, Liquid Bleach
Coffee	Alkaline - Solvent	Ammonia, Liquid Bleach
Rubber	Solvent	Alcohol, Thinner
Plaster	Acid	Hydrochloric Acid
Candle Wax	Solvent	Alcohol, Thinner
Iodine	Oxidant	Liquid Bleach
Blood	Oxidant	Liquid Bleach
Ice Cream	Alkaline	Liquid Bleach

Note: It is recommended that any kind of stain needs to be cleaned immediately, as soon as possible.
